

## **GLASGOW UNIVERSITY**

2014-2026

**Project Title:** The Hub, Glasgow University  
**Location:** Glasgow, Scotland  
**Clips used:** FireClips

A major £10 million redevelopment of The Hub at the University of Glasgow work and meeting zones for Hub staff. A modern fire alarm system was installed and LINIAN was the preferred method of fixing for the MICC cable, proving itself to both the main client and the contractor by **saving time and money** without compromising safety or quality.

**The contractor now uses LINIAN on all installations** being converted from the traditional mineral clip, plastic plug and woodscrew method enhancing their reputation in the alarm industry.

**The LINIAN Clip is approved for all installations within Strathclyde and Glasgow University.**
